

Format and Reload the DNS by using kill or Ndc

Agenda

- How DNS Works
- Formatting & Reloading DNS Server
- DNS Commands hands-on

DNS Basics

Formating & Reloading DNS

Linux:

starting: `/etc/rc.d/init.d/named start`

stopping: `/etc/rc.d/init.d/named stop`

restarting: `/etc/rc.d/init.d/named restart`

FreeBSD:

For Bind 9.3 and up:

starting: `/usr/local/etc/rc.d/named.sh start`

stopping: `/usr/local/etc/rc.d/named.sh stop`

restarting: `/usr/local/etc/rc.d/named.sh restart`

For Bind 8.x:

starting: `/usr/sbin/named -u named`

stopping: `/usr/sbin/ndc stop -u named`

restarting: `/usr/sbin/ndc restart -u named`

Thank You
