

Add a new user account Answers:

1. /etc/passwd
2. We can change shell for an user by these steps:
vi /etc/passwd

Last field is shell:

From

```
user1:x:1000:1000:user1,,,:/home/user1:/bin/sh
```

To

```
user1:x:1000:1000:user1,,,:/home/user1:/usr/local/bin/bash
```

Save and close the file.

3. UID of root user is 0.
4. User can be locked in many ways. One of them is by the following method:

```
# passwd -l <username>
```
